

# STRATOFUSE<sup>®</sup> LUMBAR

Structural Lumbar Allograft

# STRATOFUSE® LUMBAR

## Structural Lumbar Allograft

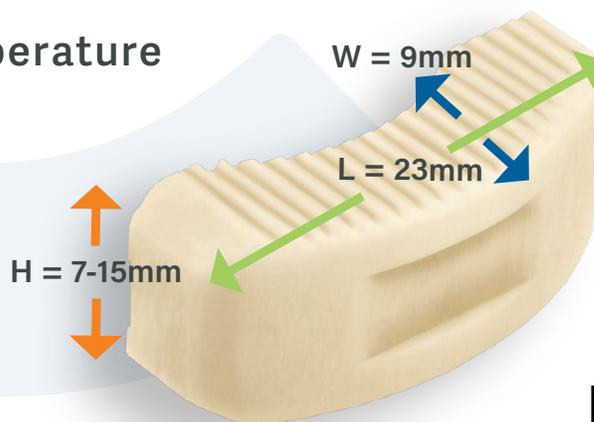

STRATOFUSE® Lumbar Spacers are made of 100% cortical bone to maximize the strength and stability of each implant. Anti-migration ribs and a length of 23mm allows for placement of the allograft to provide the optimal disc space coverage. The multiple height options available and dual-surgery technique capability allows for physicians to match their clinical needs and desires.

### Featured Benefits

- 100% Cortical Bone
- Length: 23mm, Depth: 9mm
- Heights: 7-15mm, 2mm Increments
- Anti-Migration Ribs
- Stored at Ambient Temperature
- Sterile: SAL  $10^{-6}$
- Source: Femur or Tibia

### Available Footprints

- 7x23mm
- 9x23mm
- 11x23mm
- 13x23mm
- 15x23mm
