# TIGER SHARK™ TL

3D Printed Lumbar Interbody Spacer System

The **ChoiceSpine Tiger Shark™ TL** is a 3D manufactured titanium alloy interbody created with a proprietary organic porous structure called BioBond™. Along with the BioBond porous structure, Tiger Shark TL contains a generous graft window and a smooth bullet shape distal surface for fast insertion and maximum bone ingrowth.

## FEATURES

-  BioBond 3D printed titanium matrix to enhance bone growth and fusion
-  Built in 6° lordosis which improves restoration of lumbar lordosis
-  Large center opening for packing bone graft material
-  Passive inserter
-  Osteoconductive, hydrophilic surface
-  Various heights: 7, 8, 9, 10, 11, 12, 13, 14mm

Biobond™ 3D Printed Organic Porous Structure

Excellent Visibility Under Fluoroscopy
